

SPECIFICATION AMENDMENTS

In response to the Examiner's objection to informalities on page 7, replace the last paragraph on the page with the following rewritten paragraph to correct the spelling of porphyrins.

-- In accordance with this form of the invention, it is frequently desirable to utilize light source(s) emitting electromagnetic radiation above 200 nm. In accordance with the present form of the invention, the light emitted by the light source is specific to or filtered to pass there through electromagnetic radiation of energies specific to excite pyridine nucleotides, flavins, porphyrins, cofactors, and/or calcium dipicolinate.--
